# Biophysics Reviews

**A journal for research that intersects  
the biological and physical sciences**

Editor-in-Chief:

**Kit Parker**

*Harvard University, Cambridge, Massachusetts, USA*

Executive Editor:

**Luigi Longobardi**

*AIP Publishing*

BPR is a new journal featuring comprehensive and authoritative reviews and original research that covers all areas of biophysics. BPR publishes studies of high quality and general interest to the biophysics community. The journal's focus includes experimental and theoretical research in fundamental issues in biophysics alongside its applications in other branches of science, medicine, and engineering.

**First papers are expected to publish in Fall 2020.**

**BRIDGING  
DISCIPLINES,  
ADVANCING  
RESEARCH.**

## Biophysics Reviews

Now open for submissions

*Biophysics Reviews* joins *Applied Physics Reviews* (Impact Factor 17.054) to highlight the influential research happening at the intersection of biology with the physical sciences. New from AIP Publishing, BPR is now open for submissions.

- Biomechanics
- Biomaterials
- Biosensors and Bioelectronics
- Bio- and Tissue Engineering and Bioprinting
- Soft Robotics
- Biomedical Instrumentation and Bioimaging
- Computational Biology and Genomics
- Drug Delivery

### **We believe that publishing should be rewarding.**

Superior editorial and customer service. We're here for you throughout the submission, review and publication process, and we'll treat your manuscript like it's our own. Publishing should be easy, not stressful.

**Making your paper the best it can be.** We'll provide expert editorial guidance and fair and constructive peer review along with the highest quality production values to help your paper make the best possible impact.

**Making sure your work gets the visibility it deserves.** You worked hard on your research, and we'll work hard to make sure it's discovered, read and cited. BPR is aimed at a broad global readership and our in-house team will help you make your paper accessible through marketing efforts designed to highlight your new discoveries to the biophysics community.

**Serving the physical science community.** As part of the American Institute of Physics (AIP), AIP Publishing supports AIP's programs to advance physics through collaboration and outreach, scientific communication, public policy, and educational programs.
