

# STRATEC CONSUMABLES

## MEETING THE CHALLENGES OF TODAY'S LIFE SCIENCE AND IVD MARKETS

### OPTIMIZING YOUR IDEA

The life sciences and IVD markets continue to grow rapidly driven by both scientific and technological innovation, as well as patient demand. STRATEC Consumables helps companies globally respond to the continuing challenges this growth brings by offering OEM development, mass manufacture and supply of polymer-based smart consumables.

Our services range from design for manufacturing to prototyping, up-scaling and mass manufacturing, content filling and packaging to global logistics.

Manufacturing is centered in Salzburg, Austria at our ISO 13485 certified facility.

Already we have delivered solutions to a number of life science and IVD innovators, including a consumable chip for Caliper's LabChip®XT platform, RainDance Technologies' Sequences Enrichment Chip and MALDI-MS slides for Shimadzu Corporation.

### YOUR BENEFITS

We aim to help life science, diagnostics and pharmaceutical companies significantly increase their business by:

- establishing long term partnerships for the seamless supply world wide of smart consumables
- providing high quality devices to maximize the number of satisfied consumers who use your products and services
- helping you to capitalize on new and innovative technologies and business models

### SERVICES & COMPETENCIES

- design for manufacturing
- mastering of micro-features such as channels, microwells, micropillars
- plating
- high precision optical injection molding
- automated bonding and lamination of microfluidic chips
- electrode printing on polymers
- surface coating techniques
- reagent / content loading
- automated assembly
- application QC
- packaging
- logistics including global warehousing, end-user distribution and cash-collection
